

Pig Barn

The pig barn is available for members to keep their swine SAE projects on the school campus. This is available if students don't have room at home. Our pig barn is run by members known as Barn Managers in the chapter, along with our teacher Mr. Meade.

Meat Lab

The meat lab is where members can learn how to process animals. Students process different cuts of meat to industry standards. This is a hands-on experience where every FFA member in our student program has the opportunity to learn the difference in the types of cuts between animal species. Mr. Meade currently supervises this facility.

Ag shop

Our program's shop provides students with life-long skills, such as metalwork and welding, wood working, electrical knowledge, and plumbing skills. This class is available to 2nd - 4th year members, and is directed by Mr. Dyer.

Sheep/Steer barn

The sheep/steer barn is the perfect place for our members to keep their steers, lambs, and/or goats. This area of our facility is run by Barn Managers and also supervised by Mr.Meade.

The Greenhouse

The greenhouse is a place where we grow plants and flowers to sell at the farm stand that we host every second Tuesday of the month. Students get a hands-on experience on how to make soil flats, plant different plants, and how to take care of them.
